Wildlife Institute of India

The Institute is a nodal national agency for research and training in the field of wildlife conservation. Its mandate includes generating quality knowledge in wildlife science and complement national efforts in wildlife conservation. Over the years it has served the capacity building needs for scientific planning, management and research in the field of wildlife conservation both in country and the region.

Course Background

Conservation of biological diversity through establishment and management of Protected Areas (PAs) is globally recognized. It is also important that such PAs are managed as component of the landscape complex in which they are located. Management of protected area network therefore requires personnel with appropriate knowledge and skills in managing the wilderness areas along with all associated external factors operating on it. With a view to develop a pool of professionals with requisite ability to manage protected area system, a Post-Graduate Diploma Course in Advanced Wildlife Management was started in the year 1977. Thirty nine such courses have been completed till date and 40th course is near completion. The 41st course of 10 month duration is scheduled to commence on 1st September, 2019. The total intake in the program is 20.

Course Objectives

- ⊙ Provide a foundation on modern concepts in wildlife science and practice.
- ⊙ Provide an understanding of the relevant global, regional, national and state level conservation policies and legislation and enforcement.
- ⊙ Provide knowledge and first-hand experience of conservation issues and practices under varied ecological, socio-economic, political and administrative situations in the field including the vulnerability of species of wild plants and animals and their protection.
- ⊙ Provide hands-on experience in using modern scientific methods, techniques and tools that are essential contributors to conservation practices in the field.
- ⊙ Develop skills of writing scientific documents and making persuasive presentations.
- ⊙ Develop skills for preparation of an integrated scientific wildlife management plan.
- ⊙ Prepare the participant for addressing various conservation challenges in managing protected area network.
