3. Remember to select Atlas format as **MBTiles SQLite** only.

4. Select the map source according to your choice.

5. If you want to locate your administrative area easily on the map, load the gpx file by clicking on **Load gpx**, although this is not mandatory. If gpx file is not available, then search and select the administrative area based on your knowledge.

6. 'Zoom in' the map and select the area of interest. To increase the map resolution select different **Zoom level** and increase the number of tiles.

Note: Try to keep the number of tiles not more than 3500; otherwise, file size will be heavier and it might take longer time to be uploaded in the device.

7. Click Add Selection

8. Click Create Atlas.

9. Select Ignore download errors and continue automatically check box. Wait for the process to complete.

10. After the status is finished, close the window.

11. Find mbtiles in atlases folder within Mobile Atlas Creator folder.
